

The Integrated Modular Centrifugal & Mixed-flow Pump Design Tool

PumpoN

Easy & Fast software to design pump

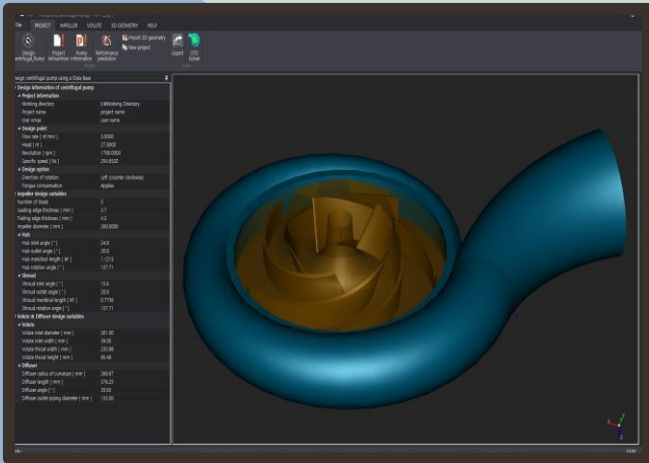

anflux 

PumpON

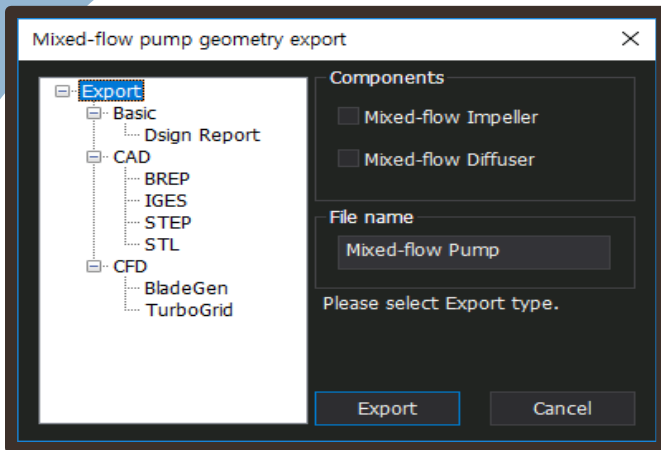

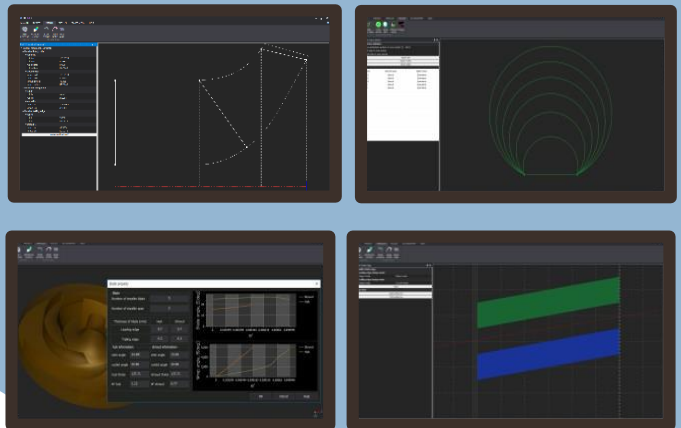

Centrifugal and Mixed-flow pump design program of 150 ~ 1200 specific speed

PumpON, the easy & fast program to design high efficiency pump.

- PumpON design more efficient pump components(impeller, volute and diffuser) than other software without further optimization process based on shape optimization for wide range of specific speed.

- PumpON is a design software for centrifugal and mixed-flow pump using an optimum data-base

- PumpON provides CAD geometry of the recommended design and it can export data.
- User can estimates pump performance from preliminary performance curve.
- Meridional shape, beta angle, etc, ... Modifiable.

ANFLUX Co.,Ltd

Head office: [08378] 806, Daerungpost Tower III, Digital-ro-34-gil 27, Guro-gu Seoul Korea

TEL : 02)2028-0300 | FAX : 02)2028-0301

Daejeon laboratory : [34115] B-226, Hansko Institute of Technology
